DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, and Group III in Paper No. 7 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner. This is not found persuasive because Group II deals with program codes as well as a record medium, therefore the monitoring system has new structural limitation, causing a new search to be performed and thus a serious burden on the examiner.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-14, and 21-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to the nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claim 18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claim 18, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

7. Claims 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Sites et al. (USPN 6413233).

Sites et al. discloses a real-time monitoring system performing real time communication with external apparatuses, including one or more medical apparatus, and comprising a communication means, a storing means, a comparing means, displaying means, and a controlling means. (Col. 7, lines 10-51, Col. 16, lines 25-67 and entire reference).

Sites et al. discloses where the contents displayed on the displaying means are stop information, flows, alarm conditions and patient information, and where the medical apparatuses are infusion pumps. (Col. 32, lines 10-50).

8. Claims 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kenley et al. (USPN 6146523).

Kenley et al. discloses a monitoring system comprising a communication means, a storing means, a comparing means, displaying means, and a controlling means. (Col. 7, lines 1-34, and Col. 11, lines 25-50).

9. Claims 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Hochman (US 2001/0049608).

Hochman discloses a monitoring system comprising a communication means, a storing means, a comparing means, displaying means, and a controlling means. (Paragraph [0033] – [0039]).
